

StarShip Parcel

To achieve and maintain strong customer loyalty, it's essential to get your inventory in the hands of your paying customers as quickly and economically as possible. Sage MAS 500 ERP software allows you to do just that with StarShip Parcel, an innovative add-on module.

StarShip Parcel, built by V-Technologies, integrates tightly with Sage MAS 500 software and makes the entire shipping process more fluid. StarShip Parcel helps your company become a more competitive distributor and even has the potential to reduce shipping and shipping-related expenses of small parcel shipments.

StarShip Parcel automates the shipping process by:

- Calculating freight charges through the use of an optional integrated scale
- Rate shopping between carriers to find cost-reduction opportunities
- Supporting third-party parcel insurance to cut parcel insurance costs
- Printing carrier-approved, bar-coded shipping labels and COD tags at the warehouse workstation for convenience and speedy processing
- Utilizing personalized rules to determine how and when freight is updated
- Simplifying the task of refund processing by reporting shipments that the carrier fails to deliver by the guaranteed date/time

The bi-directional Sage MAS 500 StarShip Parcel Link is easy to use and can maximize productivity in your busy warehouse.

BENEFITS

Minimize expenses by comparing shipping rates from multiple carriers, including published rates and custom negotiated rates

Improve efficiency by printing carrier-approved, bar-coded shipping labels and COD tags at the warehouse workstation

Freight amount and tracking number are saved in Sage MAS 500 for quick responses to customer inquiries and faster, more accurate billing

All Packages	207.60	207.60	217.60

◀ *Tightly integrated with Sage MAS 500, StarShip Parcel automates the process of rate shopping among multiple carriers, printing carrier-approved labels, and accurately tracking detailed shipping charges.*

How StarShip Parcel Works with Sage MAS 500

1. When your warehouse workers finish filling in the Sage MAS 500 shipment screen within Sales Order, they launch StarShip Parcel.
2. The StarShip Parcel screen is populated with all of the necessary customer, shipping, hazardous materials indicator, and pricing fields. In addition, standard package dimensions defined in Sage MAS 500 Carton Maintenance are passed to StarShip Parcel automatically so warehouse personnel don't need to manually enter this information.
3. If a scale is integrated, the worker places the package on the scale and freight charges are automatically calculated based on the shipping method.
4. Optionally, the warehouse worker can select different carriers to shop for the best rate.
5. Once data entry is complete, the shipping label prints from StarShip Parcel, it's affixed to the package, and your shipment is on its way.
6. Pressing the Save button triggers StarShip Parcel to write the freight amount for the shipment and the primary package tracking number back into Sage MAS 500 for follow up and rapid response to customer inquiries.

Multiple Carriers Supported

- The standard StarShip Parcel module processes shipments for UPS® and FedEx. Additionally, you can purchase functionality for processing shipments for the U.S. Postal Service, DHL (formerly Airborne Express), Spee-Dee Delivery Service, and a user-definable carrier.

Standard Carriers

UPS

- StarShip Parcel is a UPS Ready solution, so you can rest assured the software is fit to electronically upload shipment files and reference data to the UPS Data Center. This allows your customers to track their packages without calling your busy customer service staff.
- Easily print UPS Maxicode labels and COD tags on thermal label printers for high-quality, scannable labels.

FedEx Basic

- Ship and track your FedEx domestic and international shipments in real-time using the Internet.
- Calculated freight charges are based on published or custom rates. This provides flexibility when billing your customers.
- Prints bar coded shipping labels on thermal or laser printers.
- StarShip Parcel is a certified FedEx Compatible Solution.

Optional Carriers

United States Postal Service (USPS)

- Manifest your mail by printing permit labels, manifest reports, and postage statements.
- Delivery Confirmation barcoded labels have been tested for accuracy and approved on a national level, ensuring that StarShip Parcel is delivery confirmation certified.
- Automatically upload USPS Delivery Confirmation shipment detail to the USPS.
- Requires USPS module.

DHL (formerly Airborne Express)

- Ship and track your DHL domestic and international shipments in real-time using the Internet.
- Utilize your custom rates and print bar coded shipping labels.

Spee-Dee Delivery Service

- Calculates zone and freight charges.
- Prints shipping labels, COD tags, and manifests.
- Supports Shipment Weight and Metro service.

User-Defined Carrier

- Use the module to define up to 10 parcel carriers or keep track of shipments going out through your internal fleet.
- Supports one service (Ground) with up to 100 zones and rates for 1 to 200 lbs. per zone.
- Prints shipping labels, COD tags, and manifests.

Optional Interfaces

FedEx High Volume

- Shipment transactions are sent through the FedEx Ship Manager Server allowing for faster processing time.
- Supports domestic and International Express, Ground, and Home Delivery.
- StarShip Parcel is a certified FedEx Compatible Solution.

End-to-end solutions. Expert advice.
Ongoing support. That's Sage 360°.
