

Sage Accpac HRMS

What's New in Sage Accpac HRMS v8.5

Sage Accpac HRMS

Sage Accpac HRMS delivers tightly integrated functionality across human resources (HR), payroll, benefits, training, and attendance, with rich reporting and analysis capabilities, plus a Web workforce portal with employee self-service, company communications, benefits enrollment, recruitment, and more. These new features enhance your Sage Accpac HRMS system with more flexibility, ease of use, and enhanced reporting options.

Sage Accpac HRMS core

Sage Accpac HRMS v8.5 has new added functionality for the tracking of veteran reporting categories to accommodate the required annual reporting for federal contractors on or after December 1, 2003. A new VETS-100A form implements certain provisions of the JVA and raises the VETS-100 reporting threshold from \$25,000 to \$100,000.

Sage Accpac HRMS eRecruiter module

eRecruiter is a Web-based recruitment management solution designed to help you launch online recruiting strategies and optimize your entire recruiting process. It's designed with HR departments in mind, whether the recruiting function is performed by busy HR managers, dedicated recruiters, or hiring managers.

eRecruiter for Sage Accpac HRMS v8.5 has several new enhancements: the ability to identify applicants who do or do not meet job requirements, filter EEO reports using meet/does not meet job requirement flags, new Veteran categories added to eRecruiter Applicant Profile, and new Veterans category responses will transfer to HRMS at hire.

To allow flexibility for customers to ask compliance-related applicant questions, Sage Accpac HRMS eRecruiter now allows the administrator to select which questions to display on the application and the applicant profile pages, for example: age, gender, citizenship, and work permit status.

Sage Accpac HRMS v8.5 Supports:

- Windows® 2000 Server Standard or Advanced Edition (SP4 or above)
- Windows® 2003 Server Standard or Enterprise Edition (SP1 or above)
- SQL Server® 2000 Standard Edition (SP4 or above)
- SQL Server® 2005 Standard Edition
